### HOW THE SYSTEM WORKS

The ColorPlus System consists of a 100% acrylic Neutral Concentrate (available with or without sand) and the ColorPlus Pigment Dispersion. What is truly remarkable about the ColorPlus System is the fact that only 2 gallons of ColorPlus pigment are needed to colorize an entire 30 gallon keg of Neutral Concentrate.

### EASE OF MIXING

ColorPlus is a highly concentrated pigment dispersion that disperses readily in Neutral Concentrate. Our proprietary technology enables ColorPlus to disperse completely with minimal mixing.

## PICKLEMASTER™ SYSTEM

A SPECIALIZED COATING SYSTEM DESIGNED FOR USE ON PICKLEBALL COURT SURFACES

### REVOLUTIONIZING PICKLEBALL COURT SURFACES

Pickleball court surfaces are identical to tennis and basketball surfaces, for asphalt or concrete courts. They are textured with a smooth and rounded, non-aggressive silica sand. This provides a slip-free surface in dry and wet conditions. Not only are these 100% acrylic surfaces safe and beautiful, but they also seal and preserve your asphalt and concrete investment for years of fun recreational use.

#### PickleMaster Benefits:

- Very low maintenance
- Ideal for minimizing surface glare
- Asphalt and concrete preservation
- Can be used with ProCushion layers to create cushioned pickleball courts

## PICKLEMASTER™

A SPECIALIZED COATING SYSTEM DESIGNED FOR USE ON PICKLEBALL COURT SURFACES

The neutral-based coating is designed to be tinted with ColorPlus Pigment Dispersion, resulting in 17 standard color choices and a larger palette of options with the ColorPlus Fusion blends.

PickleMaster is factory-textured to provide a safe, non-slip surface with a non-aggressive texture to minimize ball wear.
