

WINTERIZATION

SEALMASTER SEALER
APPLICATION EQUIPMENT

SealMaster[®]

Pavement Products & Equipment

FOR MACHINERY EQUIPPED WITH A PUMP

- 1 Fill material tank with approximately 50 gallons of water and agitate well. Pump the water out through the spray wand and spray bar.
- 2 Disconnect the spray hose and lay it on the ground in a fully extended position allowing it to drain completely.
- 3 Find the lowest point on the material pump plumbing system and open drain valve or remove plug.
- 4

| | |
|--|--|
| If you have a Roper, Bowie, or similar type gear pump: Loosen all of the bolts on the back plate. Separate the end plate from the center case so that the water drains out. Leave end plates separated over the winter. | If you have an air diaphragm pump: Disassemble the pump and allow water to drain out. Leave pump disassembled over the winter. |
|--|--|

NOTE Antifreeze option for winterizing pumps:

Rather than disassembling pumps for the winter you may elect to pour a couple gallons of propylene glycol into the basket strainer. Turn on pump to distribute the antifreeze throughout the system. In the spring time you will need to flush the system thoroughly with water and dispose of waste water properly.

WATER TANK SYSTEM

- 1 Remove the drain plug on the water tank and water pump, and allow to drain completely. Or, you can run antifreeze through the system making certain to flush thoroughly in the springtime.
- 2 Drain gasoline from engine.
- 3 Disconnect the battery and take it inside your building, wash the battery with a solution of baking soda and water.
- 4 Cover the engine with a plastic trash bag.
- 5 Cover any locking caps with plastic sandwich bags.
- 6 Put a thin layer of grease on any exposed hydraulic cylinders.
- 7 Scrape any sealer residue from inside the tank and on the outside of the machine.
- 8 Now is the time to do any necessary maintenance and repairs.
- 9 Sandblast and repaint.

PROFESSIONAL SERVICE...

SealMaster has the industry's largest network of professionally trained pavement maintenance contractors to assure successful results at competitive prices. Our network of highly trained and experienced professionals are available to provide on-site project recommendations as well as full application services to assure quality results on every project.

A GLOBAL LEADER...

With over 65 Manufacturing and Distribution centers coast to coast along with manufacturing and product distribution in over 50 countries, SealMaster continues to be a global leader in pavement maintenance. SealMaster's unparalleled record of technological advances in both product and application equipment continues to set us apart as a true industry leader.

A TRADITION OF QUALITY & INNOVATION...

For over 40 years, property owners and government agencies have turned to SealMaster for innovative, cost-effective pavement maintenance solutions. SealMaster products are designed to repair, protect and beautify pavement, greatly enhancing your property's curb appeal. SealMaster continues to be an industry innovator with over one billion gallons of pavement sealer applied world-wide.
