

LIQUID ROAD SPOTLIGHT

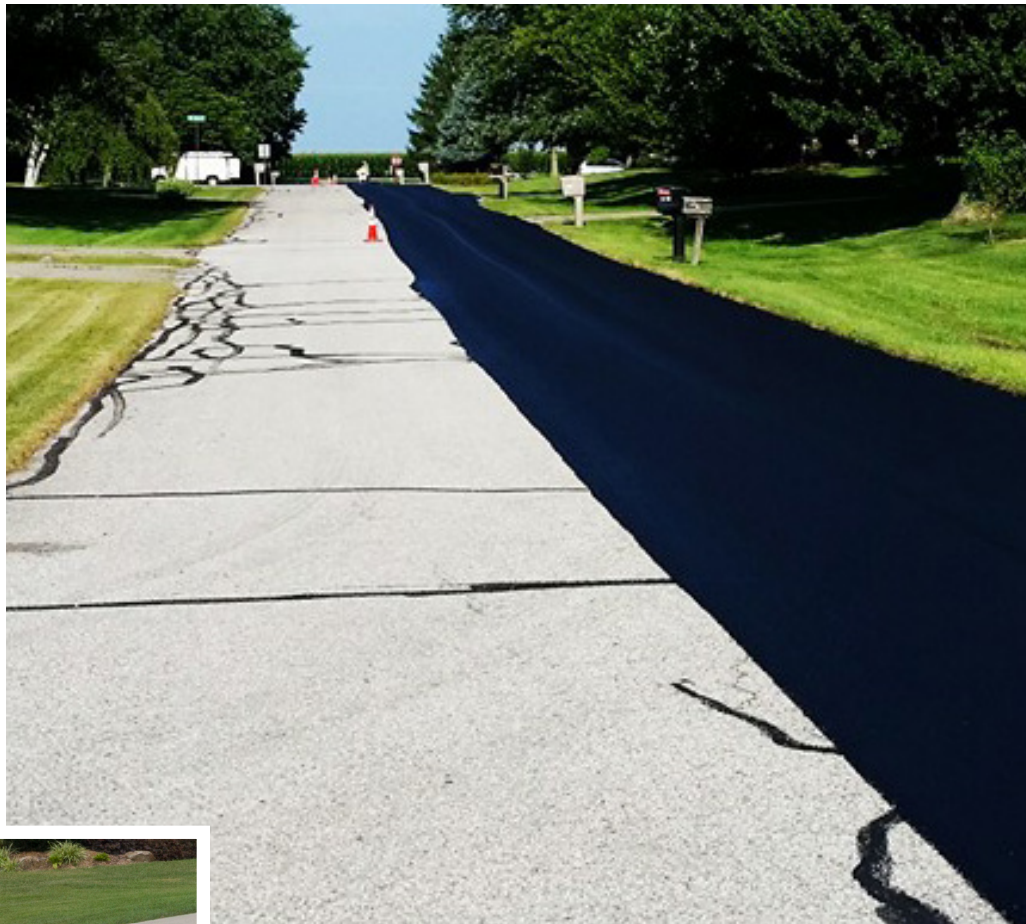

THE ULTIMATE COATING FOR ROADS, STREETS, & OTHER PAVEMENT SURFACES

JASPER, INDIANA

SEALMASTER/
INDIANAPOLIS

2012-2019
87,500 GALLONS

Jasper, Indiana, has applied two coats of Liquid Road to its city streets for seven consecutive years. Certain sections of the town are earmarked annually to receive the bituminous surface treatment, which is a key component of Jasper's pavement preservation program.

ABOUT LIQUID ROAD

SealMaster Liquid Road is an asphalt-based pavement coating for roads, streets, parking lots and other pavement surfaces. Polymer-modified and fiber-reinforced, Liquid Road is formulated with specially graded aggregate for optimum durability and slip-resistance. Liquid Road significantly extends pavement surface life, lasts up to three times longer than conventional sealer, is easy to apply, and has minimal impact on traffic flow.

LIQUID ROAD SPOTLIGHT

THE ULTIMATE COATING FOR ROADS, STREETS, & OTHER PAVEMENT SURFACES

LUCAS OIL RACEWAY

SEALMASTER/
INDIANAPOLIS

92,250 GALLONS

The National Hot Road Association chose Liquid Road for its flagship racing facility, Indianapolis Motor Speedway. The bituminous surface treatment was used on parking lots and roadways that are not used for racing.

Polymer-modified and fiber-reinforced, Liquid Road is formulated with specially graded aggregate for optimum durability and slip-resistance. Liquid Road significantly extends pavement surface life, lasts up to three times longer than conventional sealer, is easy to apply, and has minimal impact on traffic flow.

LIQUID ROAD SPOTLIGHT

THE ULTIMATE COATING FOR ROADS, STREETS, & OTHER PAVEMENT SURFACES

LAS CRUCES, NEW MEXICO

SEALMASTER/ALBUQUERQUE

40,000 GALLONS

Liquid Road [A] and Slurry Seal [B] were applied to adjacent parking lots at the University of New Mexico three years ago within three weeks of one another. The lot with Slurry Seal has dramatically faded and required restriping several times. The Liquid Road lot has retained its “like new” appearance and has not required restriping.

SealMaster Liquid Road is an asphalt-based pavement coating for roads, streets, parking lots and other pavement surfaces. Polymer-modified and fiber-reinforced, Liquid Road is formulated with specially graded aggregate for optimum durability and slip-resistance. Liquid Road significantly extends pavement surface life, lasts up to three times longer than conventional sealer, is easy to apply, and has minimal impact on traffic flow.

LIQUID ROAD SPOTLIGHT

THE ULTIMATE COATING FOR ROADS, STREETS, & OTHER PAVEMENT SURFACES

NOBLESVILLE, INDIANA

SEALMASTER/
INDIANAPOLIS

6,800 GALLONS

Two coats of Liquid Road were applied to the roads of a Noblesville, Indiana, housing development. Upon completion, the development looked as if the roads had been newly paved.
