LIQUID ROAD®
ASPHALT BASED PAVEMENT COATING

Advantages:
• Polymer-modified and fiber-reinforced for ultimate durability
• A tough, aggregate-filled bituminous coating provides skid resistance and lasting protection

Liquid Road Uses:
• Low Traffic Roads
• Neighborhoods
• Gated Communities
• Parking Lots
• Airport Taxiways
• Highway Shoulders

MIXING PROCEDURES:
(Based on 100 gallons of Liquid Road)

Liquid Road ....................................................... 100 gallons
Sand ................................................................. 400 lbs.

A 20-30 mesh AFS sand is recommended for parking lot applications. An 11-15 mesh AFS sand is recommended for road applications.

NOTE: A small amount of water may be added to facilitate application.

MATERIAL REQUIREMENTS: For parking lot application
(20-30 mesh sand) - 55-66 square feet (6.11-7.33 square yards) per gallon per coat.

For road application (11-15 mesh sand) - 36-45 square feet (4.5 square yards) per gallon per coat.

Liquid Road is mixed with specially graded aggregate and applied to the road surface. The result is a highly durable, slip-resistant surface treatment that greatly extends pavement service life. Liquid Road is cost-effective and easy to apply with minimal impact on traffic flow.
