

SAFE RIDE APPLICATION KIT

AVAILABLE ON PAGE 83

SAFE RIDE™ BICYCLE LANE COATING

Features:

- Highly durable, 100% acrylic, crosslinking polymer technology
- Single component, ready-to-apply coating
- Bright green color provides a safe zone for bicyclists
- Meets MUTCD color recommendations for bike lane green

PRODUCT #	DESCRIPTION	WEIGHT	PRICE
M2280P	5 - Gallon Pail	72 lbs.	\$210.99

MATERIAL REQUIREMENTS (coverage): Typically one gallon will cover approximately 50 square feet per coat. Two to three coats are recommended for optimum durability and performance.

SAFE RIDE™ BUS LANE COATING

Features:

- Highly durable, 100% acrylic, crosslinking polymer technology
- Single component, ready-to-apply coating
- Highly visible, red color provides a designated lane for buses and a safe zone for loading passengers

PRODUCT #	DESCRIPTION	WEIGHT	PRICE
M2285P	5 - Gallon Pail	72 lbs.	\$210.99

MATERIAL REQUIREMENTS (coverage): Typically one gallon will cover approximately 50 square feet per coat. Two to three coats are recommended for optimum durability and performance.

SAFE RIDE APPLICATION KIT

This unique drag box assembly provides a fast, simple and easy method for applying Safe Ride bike lane paint. Pails of Safe Ride are poured into the brush box assembly as it is being pulled backward. The result is a fast, efficient method for applying Safe Ride on both big and small jobs. No pumps, clogging spray tips, or overspray on curbs, concrete, asphalt and cars.

THE KIT INCLUDES:

- 24", 36", 48", and 60" brush box frames with brushes
- Water boxes
- Weights
- Handle that fits all brush box frame sizes
- Two flexible plastic brush transfer slides [allows you to cross intersections with no drips].
