PRODUCT DESCRIPTION & BENEFITS
SportMaster ColorPlus Pro is a highly pigmented coating system designed for tennis courts and other sport and recreational pavement surfaces.

ColorPlus Pro features superior hiding, vibrance, and ultra-violet fade resistance.

COLOR

LEED: SS Credit 7.1:
Heat Island Effect: Non-Roof
*Specific colors may contribute toward LEED credits.

SURFACE PREPARATION
Pavement surface must be cleaned entirely of dust, dirt, and debris. Repair of pavement surface defects, depressions and cracks must be completed prior to application. All repairs must be flush and smooth to adjoining surfaces.

New asphalt surfaces must cure 14 to 30 days prior to application. It is recommended that any uncoated asphalt surface receive one or more coats of Acrylic Resurfacer (Technical Bulletin CMT - 3) as required by surface roughness and porosity to provide a smooth, dense underlayment for application of color coatings.

New concrete surfaces must cure 28 days prior to application. Concrete surfaces should have a medium broom finish or similar roughened texture. Etch surface with muriatic or phosphoric acid and apply SportMaster Acrylic Adhesion Promoter (Technical Bulletin CMT - 21), prior to color coating.

MIXING PROCEDURES
Mix in the following order for 55 gallon drum of Neutral Concentrate:

SportMaster Neutral Concentrate...........55 gallons
SportMaster ColorPlus..........................8 gallons
Water.................................................28-33 gallons
Silica Sand .............................................400 lbs.
(70 to 90 mesh AFS)

Mix in the following order for 30 gallon keg of Neutral Concentrate:

SportMaster Neutral Concentrate..........30 gallons
SportMaster ColorPlus.........................4 gallons
Water................................................15-18 gallons
Silica Sand ......................................200 lbs.
(70 to 90 mesh AFS)

NOTE
Mix thoroughly to ensure complete dispersion of ColorPlus.

APPLICATION
Apply mixed coating with a soft rubber squeegee. A minimum of two coats are recommended.

IMPORTANT
Surface and air temperatures must be above 50°F (10°C) during application and for at least 24 hours after application. Stir before using. Do not apply when rain is imminent or forecast. Keep from freezing. Close container when not in use.

CAUTIONS
Do not store in direct sunlight or where temperatures exceed 100°F. Do not apply if rain is imminent or forecast. Keep from freezing. Close container when not in use. Refer to product Safety Data Sheet (SDS) for additional safety information and precautions.

WARRANTY
The statements made on this technical bulletin are believed to be true and accurate, and are intended to provide a guide for approved construction practices. Manufacturer does not make, nor does it authorize any agent or representative to make any warranty, express or implied, concerning this material as workmanship, weather, construction, equipment utilized and other variables affecting results are all beyond our control. Manufacturer warrants only that the material conforms to product specifications and any liability to the buyer or user of this product is limited to the replacement value of the product only. In no event shall Manufacturer be liable for any injury, loss or damage, either direct or incidental, special or consequential, however arising,
in connection with material or equipment furnished or work performed. Manufacturer shall not, in any manner, be liable for any defects, variations or change in condition in the substructure over which its products are installed.
