3. PRODUCT DESCRIPTION & BENEFITS
Petro Seal is a concentrated latex based emulsion designed for sealing and priming oil spots on asphalt pavement prior to applying pavement sealer. Petro Seal helps prevent oil and gas from bleeding up through freshly applied asphalt or coal tar based pavement sealer. Petro Seal is a concentrated material that can be diluted up to 2 parts water to one part Petro Seal.

Basic Uses: For any asphalt pavement surface including parking lots, driveways, airports, and more.

Composition: Petro Seal is a latex emulsion blend containing specialty surfactants designed for priming petroleum based stains.

Sizes: Petro Seal is available in 5 and 55-gallon containers.

Limitations: Petro Seal shall not be applied when temperature is expected to drop below 50°F within a twenty-four period after application.

4. TECHNICAL DATA
Environmental Considerations: Petro Seal is an environmentally friendly water based latex emulsion containing less than 150 grams per liter volatile organic content (VOC).

Physical/Chemical Properties:

5. INSTALLATION
Surface must be free from dirt and dust. Wipe up or scrape excessive build-up of oil, grease, and gasoline spots. A torch may be used to burn away any residual.

Methods: Petro Seal shall be applied by roller, brush, or spray application tools.

Mixing Procedures: Petro Seal is supplied in concentrate form. Petro Seal can be diluted up to 2 parts water to 1 part Petro Seal. However, a 1 to 1 dilution rate is typically recommended. Mix thoroughly before applying.

Application: Apply mixed Petro Seal with roller, brush, or spray. Allow to dry completely before applying pavement sealer. NOTE: A small amount of sand may be broadcast onto wet Petro Seal. Once dry, this will help create an improved mechanical bond between the Petro Seal and the pavement sealer.

Application Rate of Mixed Petro Seal: Apply properly mixed Petro Seal (Petro Seal, Water) at a rate of approximately 150-200 square feet per gallon.

Estimating Material Requirements: One gallon of Petro Seal Concentrate when mixed 1 to 1 with water will cover approximately 300-400 square feet. NOTE: Coverage rates may vary due to dilution rate, pavement porosity and method of application.

Precautions: Both surface and ambient temperature shall be a minimum of 50°F. Temperature shall not drop below 50°F in a 24 hour period following application. Keep Out Of Reach Of Children. Do not store unopened containers in freezing temperatures.

6. AVAILABILITY & COST
Availability: Petro Seal is supported by a national network of SealMaster facilities along with a national network of professional applicators.

Cost: Cost information can be obtained from a local applicator. Contact SealMaster for the name(s) of the applicators in your area.

7. WARRANTY
SealMaster warrants that Petro Seal meets the chemical composition and performance requirements set forth in section 4. Liability to the buyer or user of this product is limited to the replacement value of the product only.
9. TECHNICAL SERVICES

Manufacturer: Complete product specifications, material safety data sheets, and technical assistance is available from SealMaster.

Professional Applicators: Your local applicator is available to provide on-site inspections and recommendations to meet your specific needs.
