TrackMaster
CMT - 15

1. PRODUCT NAME:
   TrackMaster

2. MANUFACTURER:
   ThorWorks Industries, Inc.
   2520 S. Campbell St.
   Sandusky, OH 44870
   Phone: 800-395-7325
   Fax: 419-626-5477
   www.thorworks.com

Additional Plant Locations:
SealMaster has a nationwide
network of manufacturing and
distribution facilities.

Phone 1-800-395-7325 or visit
www.sealmaster.net to find the
location near you.

3. PRODUCT DESCRIPTION &
BENEFITS:
TrackMaster is a fibred asphalt
emulsion manufactured with
graded rubber particles, fine silica
sand and fillers. Fortified as supplied
with acrylic latex, TrackMaster
imparts exceptional flexibility and
durability to finished surfaces.

Color: Black

Uses: TrackMaster is designed for
protecting and beautifying asphalt
bound running tracks and field
event surfaces. TrackMaster protects
against oxidation and moisture
penetration of asphalt surfaces.
TrackMaster also reduces
maintenance costs and prolongs
the life expectancy of line striping.

4. SURFACE PREPARATION:
Pavement surface must be cleaned
evenly of dust, dirt, debris and all
loose materials and vegetation.
New asphalt must cure 14 to 30
days before application. Old,
oxidized asphalt surfaces may
require a coat of Asphalt Binder
(see Technical Bulletin CMT-12).
Depressions and shallow, damaged
areas in the asphalt surface can
be corrected by patching with
Lane One (see Technical Bulletin
CMT-16).

5. MIXING PROCEDURES:
Dilute TrackMaster with water using
the following ratio: 4 parts
TrackMaster to 1 part water.

6. APPLICATION:
As a coating, TrackMaster is applied
using a soft rubber squeegee. Some
situations may require a second
coat of TrackMaster. A second
coat would be applied in the same
manner as the first coat only after
the first coat had thoroughly dried.
It is recommended that the coated
surface be allowed to cure for 24
hours before opening up for use.
TrackMaster can also be sprayed
with air diaphragm or hydraulic
spray systems.

7. PROTECTION:
Protect finished TrackMaster Plus
surface from equipment, vehicles,
and other potentially damaging
traffic. Use soft-soled, running-type
shoes. Cleats and running spikes
are not recommended.

8. IMPORTANT:
Stir before using. Temperatures must
be above 50°F both during
application and for a period of at
least 24 hours after application. Do
not apply if rain is imminent or
forecast. Keep from freezing. Close
container when not in use.

9. DRYING TIME:
Forty-five to ninety (45 to 90) minutes
under optimum conditions.

10. COVERAGE:
First coat coverage will normally
range from 0.15 to 0.25 gallons per
square yard depending on the age,
roughness, and porosity of the
surface. Coverage on successive
coats will range from 0.15 to 0.20
gallon per square yard. Yield is
based on undiluted TrackMaster

11. CAUTION:
Do not store in direct sunlight or
where temperatures exceed 100°F.
Do not apply if rain is imminent or
forecast. Keep from freezing. Close
container when not in use.

12. WARRANTY:
The statements made on this technical
bulletin are believed to be true and
accurate, and are intended to provide
a guide for approved construction
practices. Manufacturer does not
make, nor does it authorize any agent
or representative to make any warranty,
express or implied, concerning this
material as workmanship, weather,
construction, equipment utilized and
other variables affecting results are all
beyond our control. Manufacturer
warrants only that the material
conforms to product specifications and
any liability to the buyer or user of this
product is limited to the replacement
value of the product only. In no event
shall Manufacturer be liable for any
injury, loss or damage, either direct
or incidental, special or consequential,
however arising, in connection with
material or equipment furnished or work
performed. Manufacturer shall not,
in any manner, be liable for any defects,
variations or change in condition in the
substructure over which its products are
installed.
