CrackMaster™ 3725
Crack & Joint Sealant For Extremely Cold Climates

1. PRODUCT NAME
CrackMaster™ 3725
Crack & Joint Sealant For Extremely Cold Climates

2. MANUFACTURER
ThorWorks Industries, Inc.
2520 S. Campbell St.
Sandusky, OH 44870
Phone: 800-326-1994
Fax: 419-626-5477
www.thorworks.com

Additional Plant Locations:
SealMaster has a nationwide network of manufacturing and distribution facilities.

Phone 1-800-395-7325 or visit website at www.sealmaster.net to find the location near you.

3. PRODUCT DESCRIPTION & BENEFITS
- Rapid Melting
- Self-Leveling
- Excellent Adhesion
- Quick Set-Up
- Resists Tracking

CrackMaster™ 3725 is a premium quality crack and joint sealant for portland cement and asphaltic pavements. As an economical and effective preventative maintenance treatment, CrackMaster™ 3725 prolongs pavement life by sealing cracks and joints from water penetration, which cause base failure and potholes. CrackMaster™ 3725 is formulated with selected asphaltic resins, synthetic polymeric rubbers, plasticizers, stabilizers, and inorganic reinforcing fillers. It is a hot applied, one part material that provides excellent results in cold weather and throughout repeated freeze/thaw cycles. It has superior bonding characteristics to both asphalt and cement surfaces. CrackMaster™ 3725 offers high resiliency, ductility, and resistance to weathering. CrackMaster™ 3725 forms a long-lasting seal which resists tracking in warm temperatures and remains flexible in cold temperatures.

Uses: CrackMaster™ 3725 is recommended for sealing cracks and joints in portland cement, and asphaltic pavements. It is designed to seal expansion and contraction joints, longitudinal and transverse cracks, joints between concrete and asphaltic shoulders, and random cracks.

4. TECHNICAL DATA
CrackMaster™ 3725 meets the following material requirements when tested in accordance with State Modified ASTM-D3405, ASTM-D6690, and MN DOT 3725. (See chart below).

5. MELTING AND APPLICATION
Proper surface preparation facilitates adequate adhesion and consequently the maximum life of the sealant. In order for proper adhesion, the crack/joint must be free of moisture, dust, loose aggregate, and other contaminants. The substrate and air temperatures must be 40°F or above. Sawing, routing, and/or sandblasting are the preferred methods of preparation. Use oil-free compressed air and heat to clean and dry the surface immediately prior to sealing. Cracks/joints should be sized so that the maximum extension and compression do not exceed 50% of the width. Best results are obtained when the cracks/joints are opened at least 1/2 inch wide.

6. PACKAGING
CrackMaster™ 3725 is supplied in 50 lb. cardboard cartons containing two 25 lb. blocks of material per carton.

Estimating Material Requirements:
Use the following chart as a guideline for estimating material requirements (based upon pounds of material needed for 100 feet of cracks):

<table>
<thead>
<tr>
<th>Crack Width</th>
<th>Depth</th>
<th>lbs/100 ft</th>
</tr>
</thead>
<tbody>
<tr>
<td>3/8&quot;</td>
<td>3/8&quot;</td>
<td>6.9 lbs.</td>
</tr>
<tr>
<td>3/8&quot;</td>
<td>1/2&quot;</td>
<td>9.3 lbs.</td>
</tr>
<tr>
<td>1/2&quot;</td>
<td>1/2&quot;</td>
<td>12.3 lbs.</td>
</tr>
<tr>
<td>1/2&quot;</td>
<td>1&quot;</td>
<td>24.7 lbs.</td>
</tr>
<tr>
<td>3/4&quot;</td>
<td>1/2&quot;</td>
<td>18.5 lbs.</td>
</tr>
<tr>
<td>3/4&quot;</td>
<td>3/4&quot;</td>
<td>27.8 lbs.</td>
</tr>
</tbody>
</table>

The above coverage rates are only a guideline. Actual material usage may vary due to width of application and thickness of material above pavement surfaces.

Precautions: Cracks must be free from moisture, dust, dirt, and debris. Both substrate and air temperature must be above 40°F. Keep boxes of material dry during storage. Do not store in direct sunlight.

6. AVAILABILITY & COST

Availability: CrackMaster™ Hot Pour Crack Sealants are supported by a nationwide network of SealMaster® facilities along with a national and international network of professional applicators.

Cost: Cost information can be obtained from a local SealMaster® CrackMaster applicator. Contact SealMaster® for the CrackMaster representative in your area.

7. WARRANTY

SealMaster® warrants that CrackMaster 3725 meets the chemical composition and performance requirements set forth in section 4. Liability to the buyer or user of this product is limited to the replacement value of the product only.

9. TECHNICAL SERVICES

Manufacturer: Complete product specifications, material safety data sheets, and technical assistance is available from SealMaster®.

Professional Applicators: Your local CrackMaster applicator is available to provide on-site inspections and recommendations to meet your specific needs.

The statements made on this specification sheet are believed to be true and accurate and are intended to provide a guide for approved application practices. As workmanship, weather, construction, condition of pavement, tools utilized, and other variables affecting results are all beyond our control, the manufacturer warrants only that the material conforms to product specifications and any liability to the buyer or user of this product is limited to the replacement value of the product only. The manufacturer expressly disclaims any implied warranties of merchantability or fitness for a particular purpose. Warranty is void on multi-coat applications if material made by other manufacturers is used with this product.
